

Hedgehog New Year Sliding Pop-up Craft

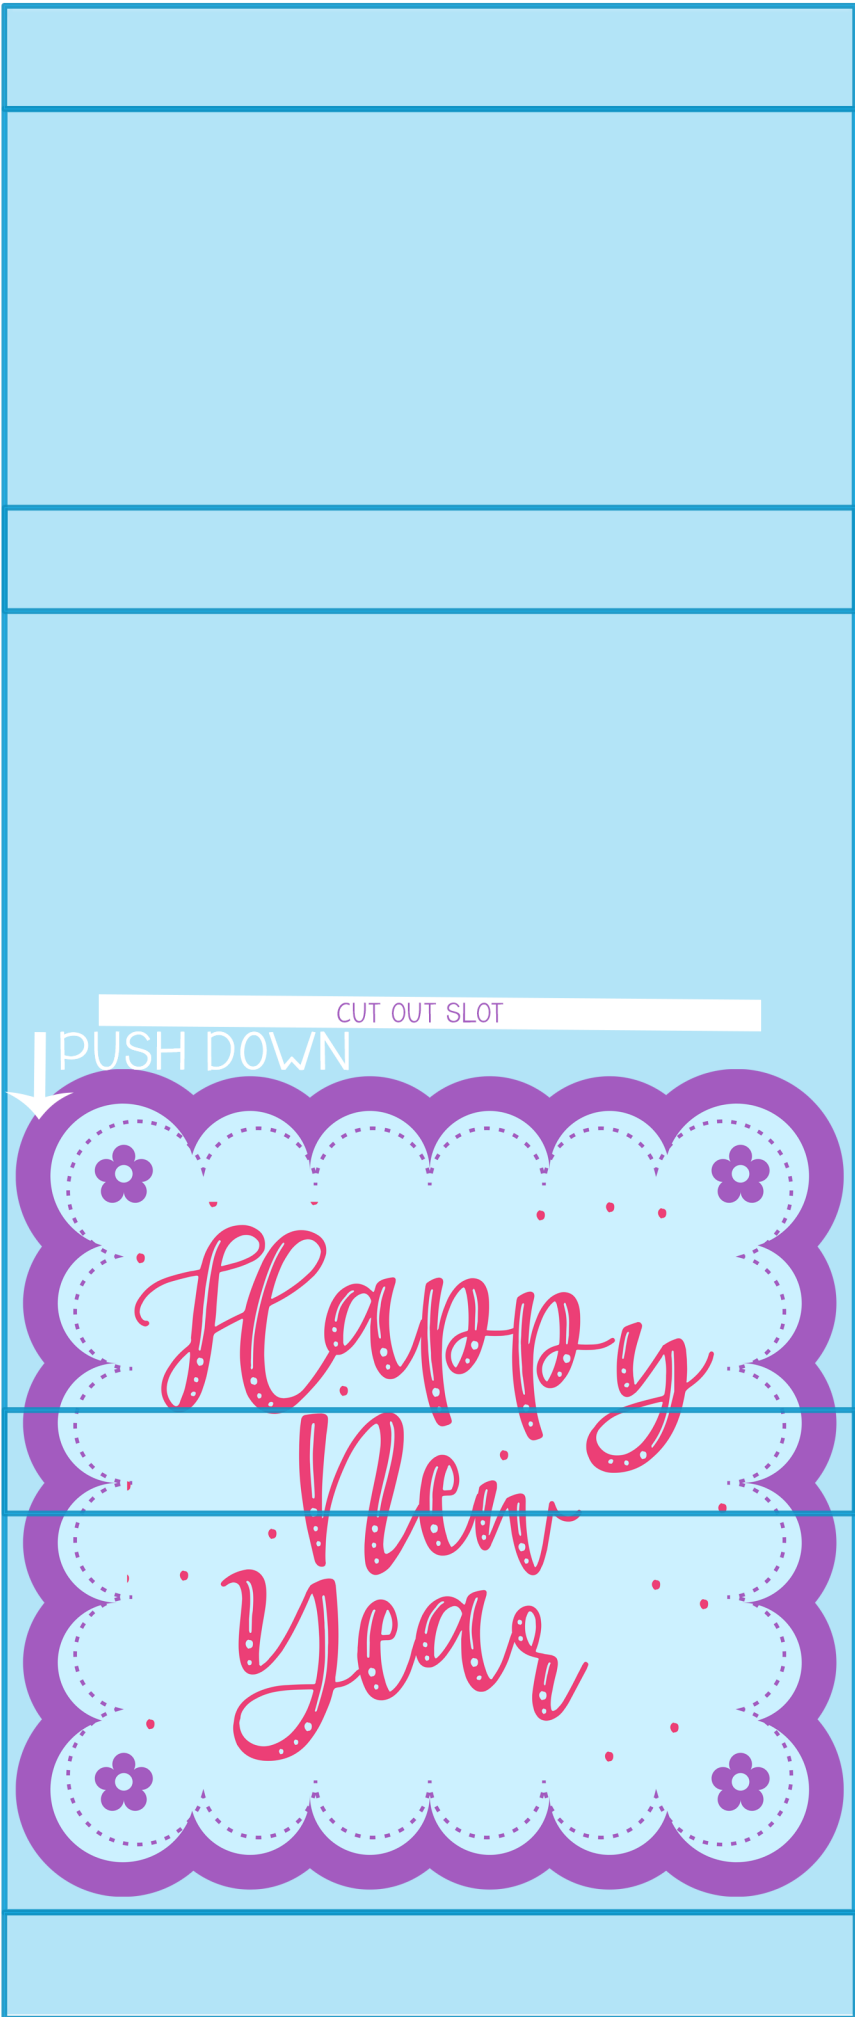

Materials:

- 2 template sheets printed on cardstock paper
- Small, sharp scissors
- Glue or glue stick
- Scoring tool, such as a dime or a wooden chopstick
- Straight edge, such as a ruler
- Pencil, pen or marker
- Adult hands helping little hands.

Directions:

1. Cut out the individual parts: main, larger "Happy New Year" card (outside), inner cards (with hedgehogs), two New Year Balls and the To/From tag.
2. Apply glue to the top part of the inner cards, then adhere the lower part of a New Year Ball to the top of each one. Allow the top of the bows to remain unglued.
3. Take both inner cards and glue them together with the blank side facing each other, including the tops of the bows. Trim away any overlap that can be seen from both sides.
4. Fill in the To/From tag with a pencil, pen or marker. Add a special message, if you would like. Glue this above the slot box fold.
5. Next, take the large outer card and fold it in half horizontally at the slot box. Carefully cut the slot open at the fold.
6. Score the solid lines with a scoring tool, then fold the lines inward.
7. Now, slide the inner card through the slot on the larger card.
8. Lie the card flat and add glue to the top and bottom flaps of the outer card.
9. Place the inner card on the top of one end and fold the outer card shut, pressing the top and bottom together to stick. Allow to dry.
10. You can now slide the outer card up and down to see the hedgehog pop up with his Happy New Year Clock!
